2026 WATER MAIN FLUSHING PROGRAM

The Cowichan Bay Waterworks District's annual water main flushing program will begin on Monday, March 23, 2026, and run for three weeks, ending on Friday, April 10, 2026.

Unless notified directly, all work will be performed on regular business days between 7:30 am and 4:00 pm. There will be no flushing during the Easter Holiday weekend.

You may notice a drop in water pressure or discolouration during this maintenance period. After pressure is restored, run a cold tap until the water runs clear.

Note: Water main flushing relating to the downtown Cowichan Bay Village area will occur at a later date. It is tentatively scheduled for April 7, 2026; however, written notice will be issued to residents and businesses along that corridor in the next week confirming the date.

More detailed information about water main flushing is available on the website at:
